Medical.

Ayer's

CATHARTIC

PILLS.

Are you sick, feeble, and

complaining? Are you out

of order, with your system

deranged, and your bowels

uncomfortable? These symp-

toms are often the prelude

to serious illness. Some fit

of sickness is creeping upon

you, and should be averted

by a timely use of the right

remedy. Ayer's Pills, which

cleanse out the disordered

humors—purify the blood,

and let the fluids

circulate in unobstructed

health again. They stimu-

late the functions of the

body into vigorous activity,

and remove the obstructions

which make disease. A cold

settles somewhere in the body,

and obstructs its functions. These, if not

removed, react upon themselves and the surrounding

organs, producing general aggravation, suffering,

and disease. While in this condition, oppressed by

the derangements, take Ayer's Pills, and see how

directly they restore the natural action of the sys-

tem, and with it the buoyant feeling of health again.

What is true and so apparent in this trial and com-

mon complaint, is true in many of the disor-

ders and dangerous distempers. The same purga-

tive effect expels them. Caused by similar obstruc-

tions and derangements of the natural functions of

the body, they are rapidly, and many of them surely,

cured by the same means. None who know the

virtues of these Pills will neglect to employ them

when suffering from the disorders they cure.

Statements from leading physicians in some of the

principal cities, and from other well-known public

persons:

From a Forcaring Merchant of St. Louis, Feb 4,

1866.

DR. AYER: Your Pills are the paragon of all that

is great in medicine. They have cured my little

daughter of numerous sores upon her hands and feet

that had proved incurable for years. Her mother

has been long grievously afflicted with blotches and

pimples on her skin and in her hair, and after all

child was cured, she also tried your PILLS, and they

have cured her.

ASA MORRIDGE.

As a Family Physic.

From Dr. E. W. Carter, New Orleans.

Your Pills are the prince of purgatives. The ex-

cellent qualities of your Pills are well known. They

are mild, but very certain and effectual in their

Medical.

CURES AND COMFORT FOR

THE BED-RIDDEN.

—BY—

Holloway's Ointment.

The wonderful Ointment acts like magic in relieving

and curing old sores, wounds, bad legs, and eruptions

of the skin; when rubbed on the surface it pene-

trates and purifies each tissue on its passage, and exerts

the most wholesome influence over the internal structure

of the body by cleansing all animal fluids with which it comes

in contact, and thereby promotes a sound and permanent

cure.

Gout and Rheumatism.

To sufferers from the racking pains of an aneurism and

gout this ointment will prove invaluable. After im-

mersion with warm water the soothing action of this Oint-

ment is most remarkable; it seems at once to lessen in-

flammation, ease pain, reduce the swelling, restore natural

circulation, and expel the disease. For the above com-

plaints Holloway's Ointment and Pills are infallible spe-

cifics.

Diaphena, Bronchitis, Sore Throats, Coughs and

Colds

his class of diseases may be cured by well rubbing the

Ointment, three times a day, upon the throat, chest and

back of the patient. It will soon penetrate and give im-

mediate relief. In all stages of Influenza, Colds and

Bronchitis, this treatment may be followed with efficacy

and safety—indeed, it has never been known to fail.

All Varieties of Skin Diseases, Scrofula and

Scurvy.

This Ointment is a specific cure for the worst form, Scrofula

or King's Evil, and the most inveterate skin

diseases to which the human race is subject. They can

not be treated with a safer or more speedy remedy than

Holloway's Ointment, assisted by the celebrated Pills,

which act powerfully on the constitution and so purify

the blood that these disorders are completely eradicated

and a lasting cure obtained.

Dropsical Swellings.

severe of this dangerous and stealthy complaint

which frequently creeps upon us by the insidiousness

of its progress, and of which little or no notice is taken

until the legs begin to swell. The cause of the evil is

not looked for in the liver and stomach, therefore set

work earnestly by taking Holloway's famous pills ac-

cording to the printed instructions and rubbing the Oint-

ment very effectively over the pit of the stomach and

right side where these organs lie. Most dropsical cases

will readily yield to the combined influence of the Oint-

ment and Pills.

Piles, Fistulas, and Internal Inflammation.

These complaints are most distressing to both body

and mind, and are usually attended with much pain and

inconvenience. Persons suffering from these ailments

should not despair, but seek relief by the use of the

Holloway's Ointment and Pills, which will give im-

mediate relief, and in all cases give permanent

cure.

Representative Institutions.

Few Colonial Governors have had so many opportunities of showing good statesmanship as the present Governor of this Colony, and few men holding the position of constitutional advisers of the Governor, by virtue of their offices as members of the Executive and Legislative Councils, have had more scope for such a display of administrative talent as can be made in a small Colony, as those gentlemen who have belonged to the Executive Council of British Columbia since the Union. The Colony has passed through a season of great depression, and has felt the want of that fostering care which an able and energetic Governor, backed by an active and judicious Executive Council, might have extended to her. The remodeling of the Government after the two colonies were united, afforded some room for the exercise of diplomatic talents in the Governor, and of administrative energy amongst his advisers. Fortunately the Colony has not suffered materially in her prospects in spite of the complete failure of the Government to do anything to help it in its time of trial. She has been kept back by lack of energy, but the great resources of the Colony still exist, and the perseverance of the colonists is gradually restoring confidence, and is slowly, but surely, establishing the fame of British Columbia as a place, which, though last, is not destined to be the least of the settlements of the world, in point of wealth and importance. But although opportunities have been thrown away and neglected, other chances may yet occur, and few men who have either achieved, or been placed in positions of any importance will allow every opportunity of distinguishing themselves to pass away; it is within the bounds of possibility that the Governor of this Colony may yet show himself inclined to listen at the last moment to the voice of the people, and he may testify his inclination by inviting the Council to consider the propriety of a change in the Constitution, with a view to obtaining both a preponderance of popular members and a liberal franchise under which members can be elected. It is impossible that Mr. Seymour can have any dread of representative institutions; it is true that under such a form of Government there might be more actual routine work for the Chief of the Executive to perform than he thinks proper to get through under the existing system; but the responsibility of the Governor is unquestionably much less in a Colony where there are representative institutions, than in a Crown Colony. It is the duty of the Governor to see that the natural antipathy, that members of the Legislative Council have to the inauguration of any change at all in the Constitution. They have not, as advisers of the Governor shown any administrative talent, nor have they evinced any of that aptitude for public business which is so necessary for the success of those who seek to take any prominent place as members of a House of Representatives; their duties as members of the Council are much more easily discharged, so long as they belong to a "select" assembly, which owes none of its vitality to the public vote, no matter how careless they may have been in their public duties, they have only one to conciliate; they have no constituents to meet, and they are perfectly well aware that their only chance of any lengthened continuance of such an unsound system as the present, is to stifle all efforts at reform before they come up for discussion; the first step is the most difficult, and the official members of the Legislative Council are well aware that when the people are properly represented in that Council, the first step is gained, retrenchment must follow, and if as a sequence we should obtain responsible Government the dreaded reform will be more than half accomplished, and the officials will have to struggle for place and position with able competitors, who are not afraid of exertion. Can we wonder then that the Executive Council are opposed to any change.

THE GREAT ECLIPSE.—No scientific person will question the fact that the fog and cold prevailing this season, over two-thirds of the world proceeds from the great eclipse of 1868. If this be so, much greater cold during the winter may be expected than the oldest inhabitant ever knew. The proprietors of the London House, with their usual foresight and sagacity, have anticipated this great cold, and are now selling at reasonable figures the *SAMPSON BEAVER CLOTH* which defies both cold and wet. This magnificent cloth is equally suited for ladies and gentlemen, and can be had only at the London House.

FRED PLYNE has removed his Cheap Shaving Shop to the opposite side of Johnson street, just above the Miner's Saloon.

Fruit Culture—Plums and Cherries.
EDITOR COLONIST.—I beg to offer a few remarks in reply to your correspondent's enquiries in a former issue, relative to the Plum and Cherry, trusting they may supply a part, at least, of the information wanted. For domestic purposes these fruits rank next in importance to the Apple; and for dessert they have few equals, and now, with the many excellent new, early and late varieties, their use for those purposes may be spread over more than four months, viz., from the end of June to November. As with the Apple and Pear, so with the Plum and Cherry, great confusion exists among the names of different varieties; and in the greater number of instances, this arises not so much from the great number of varieties which are grown, as from the number of growers, some of whom seek to profit by their crops alone, regarding but little their nomenclature; therefore, as the names given to varieties of fruit by the mere orchardist, would, in many instances only tantalize and puzzle the intending planter, I have paid no attention to them in framing the accompanying lists, but have adopted those by which the several varieties are best known to Pomologists, and which have received the sanction of such authorities as Lindley, Thompson, Rivers, and Downing.

With respect to situation and soil, both the Plum and Cherry like a sunny aspect, and will grow in almost any soil, but that in which the Plum only produces crops of the finest fruit, is a heavy loam, or one in which there is a considerable amount of clay; light soils may be greatly improved by the addition of clay as a manure. The Cherry on the other hand, does best in a good sandy or gravelly loam, resting on fine gravel or sand. In wet soils the roots soon rot, and the trees are short lived; in a soil too rich the trees run too much to wood, and are comparatively barren, and the branches are liable to split in high winds.

The season for transplanting the trees is the same as that before recommended for the Apple and Pear, and as the preparation of the soil, the various operations of planting, securing the trees against high winds, and the subsequent general management, are the same, when treating on those fruits, I need not here repeat them and will only add, in conclusion, a strong recommendation to the fruit grower, when his trees are too much crowded with fruit, and when the fruit has just passed the "stoning process," to thin liberally and unsparingly; by this means the remaining crop will be immensely improved both in size and flavor, and his trees will annually yield him a fair crop, in place of giving a heavy crop once in two years.

The following lists embrace some of the best sorts of fruits in cultivation, not only as regards flavour and size, but also for hardiness and fruitfulness, and which, it is hoped, will be found particularly fitted to our climate and requirements:

SELECTION OF PLUMS.
For July—River's Early Favorite. For August—O. Isans, Red Gage, Lawrence's Favorite, Imperial Gage, Red Diaper, McLaughlin, Yellow Gage. For September—Washington, Jefferson, yellow and red, Green Gage, Reine Claude de Bavay, Black Damson, Magnum Bonum. For October—St. Martin's Queleche, Coe's Golden Drops, Frost Gage, or Damson.

CHERRIES.
For July—Belle d'Orleans, May Duke, Black Eagle, Bigarreau, Black Tartarian, Elton, Governor Wood, Reine Hortense. July and August—Carnation. Late August—Kentish. August and September—Belle Magnifique, Mirello, old.

H. MITCHELL,
Victoria Nursery.
September, 1898.

Self Reliance to Diogenes.
DEAR DIOGENES:—Yours is a growl indeed, but it is never well to hurry any man's cattle. The return which I promise you, is in course of preparation, 'don't you be afraid,' and with it will come a little more 'bombast' and 'self laudation,' if by that you mean an honest expression of being convinced by facts, which I have been at the trouble collecting, but which you will have only the trouble of reading and the pleasure of picking to pieces, if you can I warn you to trim your wick and get a new glass to your lantern.

SELF RELIANCE.
The Mechanics' Fair—Removal of the Goods.
The sixth Industrial Fair, under the auspices of the Mechanics' Institute of San Francisco, is now numbered amongst the things of the past. The receipts of the last evening amounted to \$993 25, and after it had been counted, a gentleman present drew from his pocket \$6 75 and handed it to the Treasurer, remarking, "Add this to the receipts, and make it \$1,000." Yesterday was a busy day with the exhibitors, who were removing the articles they have had on exhibition. Some were elated with having taken premiums, and were sending their goods to Sacramento, in hopes of obtaining further honors; while those who had failed were going back to their workshops in disgust—some cursing the ignorance, and others the partiality of the Judges of Awards—claiming that if justice had been done they would have been honored above their neighbors, forgetting that others might have said the same thing, with perhaps more justice, had the awards been different. In some instances the Judges have not been as judicious as they might have been, but we believe that they all acted upon their honest convictions, and that none of them were influenced by improper motives. By four o'clock scarcely an article remained in the pavilion. The place, which for thirty-one days was the scene of bustle and activity, has become as silent almost as the grave. The "deserted hall" will remain deserted until next Tuesday evening, when the grand Carnival Ball will be given, and then it will be supremely grand. All San Francisco, and a goodly portion of the surrounding towns, will be there in their gay disguises, and representing the dead and gone characters of history. And then, after that brilliant flash, the candle will go out, and the pavilion remain dark and deserted until next year, when the seventh Mechanics' Fair will be held.—*S. F. paper.*

A CORRESPONDENT of the *Siecle Paris*, the government organ of France writes from Tunis, Algiers, as follows:—"Our College of philosophers at home, may, and probably do accomplish a great deal for the cause of science, but the Americans are the people to turn these discoveries to practical account.—Many of the modern inventions in use here are American, and one American chemist, Dr. J. O. Ayer of Lowell, supplies much of the medicine consumed in this country. His Cherry Pectoral, Pille, Sarsaparilla and Ague Cure constitute the staple remedies here, because they are of easy application, sure in their results, and have the confidence of the people. While the science of Medicine is carried to a higher perfection in our own country (France) than any other, it strikes a Frenchman as a little singular that an American Physician should furnish the medical skill and remedies for our Principal Province.

HOLLOWAY'S PILLS.—Though good health is preferable to high honor, how regardless people often are of the former—how covetous of the latter. Many suffer their strength to drain away ere maturity is reached, through ignorance of the facility afforded by these incomparable Pills of checking the first untoward symptoms of derangement, and reinstating order without interfering in the least with their pleasures or pursuits. To the young especially it is important to maintain the highest digestive efficiency, without which the growth is stunted, the muscles become lax, the frame feeble, and the mind slothful. The removal of indigestion by these Pills is so easy, that none save the most thoughtless would permit it to keep the springs of life.

HOSTETTER'S
STOMACH BITTERS!
A PURE AND POWERFUL TONIC
CORRECTIVE AND ALTERNATIVE
Of Wonderful Efficacy in Diseases
OF THE
STOMACH, LIVER AND BOWELS.
PROTECTIVE PROPERTIES.
Prevents Fever and Ague, and all Malarial Fevers
Fortifies the System against Miasma and the evil effects of unwholesome water; invigorates the organs of digestion and the bowels;
Stimulates the Nerves and Tends to Prolong Life.
REMEDIAL PROPERTIES.
Cures Dyspepsia, Liver Complaint, Sick and Nervous Headache, General Debility, Nervousness, Depression of Spirits, Constipation, Colic, Intermittent Fevers, Sea Sickness, Cramps and Spasms, and all complaints of either sex arising from Bodily Weakness, whether inherent in the system or PRODUCED BY SPECIAL CAUSES.

As a genuine Tonic, HOSTETTER'S BITTERS produce effects which must be experienced or witnessed before they can be fully appreciated.
Persons of feeble habit, liable to Nervous Attacks, Loss of Spirits, and Fits of Languor, find prompt and permanent relief from the Bitters. The testimony on this point is most conclusive, and from both sexes.
In districts infested with Fever and Ague, it has been found infallible as a prophylactic and irresistible as a remedy. Thousands who resort to it if under apprehension of an attack, escape the scourge; and thousands who neglect to avail themselves of its protective qualities in advance, are cured by a very brief course of this marvelous medicine.
Acting as a gentle and painless aperient, as well as upon the liver, it also invariably relieves the Constipation superinduced by irregular action of the digestive and secretory organs.

The Agricultural and Horticultural Exhibition.

After a lapse of three years and since the last show of the character above mentioned was held, the citizens and public in general have resolved to revive the once annual exhibitions, and yesterday in the display shown demonstrated, that in most departments we are again on the road to agricultural and stock breeding eminence. The amount subscribed for prizes, as well as the number of articles exhibited by, we understand, 130 entries, must be gratifying to all of us, and particularly to those who more immediately interested themselves in securing so successful a result; this too considering the limited time left to make arrangements with outside districts. The exhibition was held in the cattle yard of J P Davies & Co, Fort street, with the adjacent vacant lots fenced in and covered over with canvas for all articles except the live stock. Early in the morning the premises and street in the vicinity were decorated with a variety of flags festooned and hung across the street, which, with the crowd of people and vehicles passing to and fro, gave the scene an animated appearance. By 11 o'clock the arrangements which reflected much credit on the managers, were completed, and the judges commenced awarding the prizes. A F Pemberton, Thos Harris and N O Portway, Esqs, acted as Judges of the Live Stock; Messrs Leneve, R Wallace, T Lowe & J Lowe, Capt Good, E H Jackson and A Bunter acting as Judges of the produce, fruits, flowers, &c, &c. It was universally admitted that such articles as were exhibited particularly in the latter classes were excellent in character. Amongst such as deserve especial notice in live stock which was perhaps somewhat limited in numbers, we may mention the sheep (Southdowns) and hogs of Mr McKenzie; cow and calf and yearling heifer shown by Mr Sere, of the 'Richmond'; two three year old heifers owned by Mr J D Pemberton; brood sow, Mr N C Bailey, which took two prizes; the sheep exhibited by Mr Holdness, Spring Ridge; five fat sheep belonging to Mr Harvey. Upland farm and the cattle from Dr Tolmie's farm. Eight saddle horses were entered; the first prize was awarded to Mr Turgoose and special commendation given to Mr Rithet's horse. Taken upon the whole, the show of stock was scarcely what might have been expected although it must be recollected that fine animals of any kind are not the first products a young country thinks of aiming at; such results are only the consequence of long competition and increasing wealth. The produce, fruits, vegetables, cereals and hops, however were excellent in every branch, and excited much admiration. It is impossible to particularize in this department all the articles which deserve honorable mention, but we cannot omit the magnificent poms grown at Seaside; the pears, apples, plums, grapes; the carrots, potatoes, onions, beets, peas and bouquets of flowers, that graced the tables. Messrs Clarkson & Herring of New Westminster, brought down some fine samples of fruit and vegetables from the mainland; some peaches and quinces exhibited deserve a leading notice. The exhibition of poultry contained some fine samples of geese, Spanish fowls, ducks, pigeons and bantams. There were also syrups, home made wines, trunks, smoked salmon, together with such like articles of home manufacture, which were proven not to be neglected, and the samples exhibited, gave strong evidence of the progress of the Colony in those pursuits, which will hereafter enrich her. In the dairy produce, the Cowichan butter took the lead, and a large jar of cream prepared by the Messrs Davis, was highly commended. Amongst the cereals was a sample of Canadian wheat, grown by Messrs Galbraith and Hawks of Soda Creek, which attracted much attention, but there was not sufficient of it shown, to obtain a prize. Amongst the fruits, the contribution of plums from Capt Good's garden, for variety, size, richness of color and withal neat arrangement, caused much comment. There were many other articles exhibited which earned special commendation, but our space will only allow us to select the most prominent. In the afternoon, as the day was unusually fine, a large number of people of all classes visited the exhibition, and the universal verdict was that although the number of articles exhibited was not so large as could have been desired, owing to a little indifference and supineness on the part of some of our farmers, there was abundance to show what great things the Colony is capable of, and how largely her material interests may be advanced by these exhibitions. It is to be hoped, therefore the idea of having an annual exhibition for the whole Colony at different towns, in rotation, will be earnestly carried out by those who have the power to make each year's exhibition an unequalled success. The volunteer band was in attendance, and added much to the pleasures of the day by their excellent performances.

We regret it is not in our power to-day to publish more than the prizes awarded for live stock:

Dr Tolmie, bull..... \$10 00
do five fat cattle..... 10 00
do yearling heifer..... 2 50
do 2-year old heifer, 2d prize 5 00
do 2d prize 5 00

and J P Davies..... Special Prize
W Arthur, brood mare 2d prize 7 50
J E Edwards, do, highly recommended
R P Rithet, saddle horse, special prize 5 00
N C Bailey, brood sow 1st prize 10 00
and J P Davies special prize..... 5 00
Mr Holmes, brood sow 2nd prize 5 00

The Emperor of the French, wishing to civilize his people, has introduced bull fights into France. A grand spectacle of the kind was given at Havre, at which twelve bulls, tortured with darts and spear thrusts, but with horns covered with india rubber balls, were encouraged to rush at 'matadors,' 'picadors,' 'chulos,' and the rest of the performers for whom civilized Europe has not even names. Bloodshed was carefully avoided, the only attraction being torture to the beasts and risk of life to the men; but all the correspondents report that after a bull or two had been led away, the spectators began to hunger for slaughter. It is not believed that the Emperor intends to reintroduce combats of gladiators, as that might involve a loss of subjects who would make good soldiers.—*English Paper.*

A RACE UNDER WATER.—In Boston lately, there was a race of three divers, who walked a distance of 2400 feet under water in the harbor. The winner did the distance in 17 minutes. Each man was provided with a guiding line to direct him on his course, and was also accompanied by a 'surf boat' provided with air pumps, which were kept constantly at work to supply air. Extending from each boat to the diver was a life line, which is always in charge of some particular person, who acts 'tender' for the diver whenever he is under the water. On the arrival of each diver at the floating stage he was provided with a ladder, up which he climbed till near the surface, when he was assisted out and immediately disarmed, all (except appearing to be as fresh as when they first entered the water.

YALE NEWS.—From the *Examiner*. Mining on Black Creek had promised success, but want of water stopped work for the season. In the mining prosecuted by the Chinese at the Forks of Quesselle, about 1000 lbs of pure copper, in lumps, have been picked up. At Yale a mining claim is staked off close to the steamboat landing. Twenty-seven Chinamen from Kootenay have with them \$43,700, and are taking it to the Flowery Kingdom. The road tolls received during the past month amounted to \$5200, and the road to Cariboo is being repaired. The assizes will be held on the 13th; four cases are on the docket. There were 95,000 lbs of freight forwarded to the upper country last week.

THE POSTAGE STAMP CASE.—An American paper says, a case which has been pending two years in the Canada chancery court at Toronto, has just been decided in favor of our Government. It was for \$12,000 worth of stamps captured in 1864 by the rebel cruiser Florida, and sold to a merchant of Liverpool, who consigned them to Toronto for sale, where they were claimed by the United States. This case is considered very important as a precedent, as there are many similar cases pending in England and France. Caleb Cushing was the leading counsel for the United States.

MR MARSHALL WOOD, the eminent sculptor, is shortly going to Montreal with his model of a statue of the Queen, considerably larger than life, to stand in the Place Victoria of that city. The model is a commission from the City Council of the commercial metropolis. The figure is standing, wearing the Royal Crown and robes and bearing the sceptre. The likeness is well preserved, blended with stateliness, dignity, and ease. It is not yet decided whether the statue is to be executed in marble or bronze.

The steamer Enterprise arrived from New Westminster yesterday morning at 11 o'clock, being twenty-four hours in making the trip, owing to the fog. She brought down forty passengers, 200 barrels of cranberries and some other little freight; the mails and Cariboo express. Mr Park, barrister-at-law, who has been in Cariboo for five or six years, has returned, also Mr Hicks, from Kootenay. Mr Nelson, B. Inlet, Messrs Clute, Joe Copland, &c.

THE DISTANT FIRES.—There was considerable commotion last night in town after dark about the origin of the magnificent fires seen over the Sound, which at times quite illuminated the heavens. The streets were filled and Church hill covered with people watching the sight, and bets offered that some volcano had suddenly broken out.

NAVAL.—H M S Zeealous, flag of Admiral Hastings, will leave at the latter part of this month for a cruise down the coast to Central America, and will return by the Sandwich Islands. She will be absent the greater portion of the winter. The Pyralis sailed a few days since.

TOTAL RECEIPTS.—The total receipts of the Exhibition yesterday, as far as could be ascertained, would be about \$135, received from non-subscribers.

THE Gam of the Ocean, from San Francisco, on her way to the Sound, got belogged, and was off our harbor yesterday.

The steamer Diana is reported to have reached San Francisco safely, yesterday.

The people have been so much imposed upon by several worthless Sarsaparilla that we are glad to be able to recommend a preparation which can be depended on as containing the virtues of that invaluable medicine, and is worthy of the public confidence. DOCT AYER'S SARSAPARILLA cures when anything can cure the diseases that require an alterative medicine.

By Electric Telegraph.
SPECIAL TO THE DAILY BRITISH COLONIST
LAST NIGHT'S DESPATCHES.

Eastern States.
New York, Oct. 4.—A contract for the constructing of the underground railroad in New York has been concluded with an English engineer, who built the underground railway in London. They expect to enter on the work at an early day.

CHICAGO, Oct. 5.—A Republican Washington Special says, our Government has received official information that the Spanish Monarchy has ceased to exist. Its representatives here cannot be officially recognized as representing a sovereign power.

Europe.
PARIS, Oct. 4.—Queen Isabella has issued a protest against the revolution. The Paris papers argue that the force used by the rebels to depose the Queen does not injure her rights to the throne, and declares that the acts of a Junta established by violence is not binding on the people.

LONDON, Oct. 4.—A rumor is current that the success of the revolution in Spain has had the effect to induce France to make some important concessions to Italy. It is known that Prime Minister Morier is expected in Paris, and the supposition is that he comes to conduct negotiations rendered necessary by the alleged change in the policy of France.

California.
SAN FRANCISCO, Oct. 5.—The steamer Oregonian sailed for Panama at noon to-day, and the steamer Colorado will sail to-morrow morning.

SAN FRANCISCO, Oct. 5.—The Agent of the North American Steamship Company in this city publishes a card, positively denying the truth of the reports that the opposition is to be discontinued and the Company's steamers withdrawn. He says the Company is abundantly able and equally determined to continue running their ships to and from New York via Panama.

Arrived, ship Rover, from Port Discovery.

Sailed, Oct. 4.—San Sal ship Baronessa, Port Townsend; bark Samoset, Port Madison.

Oregon.
PORTLAND, Oct. 8.—The Oregon Senate passed a resolution rescinding the assent to the Constitutional Amendment.

The Steamer Geo. S. Wright sailed at 9 o'clock a.m. for Seattle.

DELAYED DISPATCHES.

Eastern States.
ST. LOUIS, Sept. 19.—The *Republican* has a letter from Walnut Springs, Arkansas, September 8th, relating that on the previous Sunday at the conclusion of religious services, the congregation were assailed by rowdies and five persons shot, of whom three are dead. The shooting is said to have been done by Radicals, as the parties shot are all Democrats.

New York, Sept. 19.—A special from St. Louis, Mo., says that without investigation into the explosion of the cartridge factory shows thirty-six killed and one hundred and ten badly wounded.

WASHINGTON, Sept. 19.—A. H. Moorehead has sued Dr Cornelius Boyle, formerly of this city, charging the latter with the imprisonment of Mrs Moorehead three years, thus preventing her return to society and the care of her husband. Damages set at \$35,000. Boyle avers that as protest marshal of Virginia, in the Confederate service, by order of General Beauregard, he prevented her crossing the lines.

LOUISVILLE, Sept. 20.—Last Thursday, Marshal Merryweather, with 50 Federal soldiers under command of Lieutenant Drury, left Louisville to protect the Marshal and his deputies in the execution of processes in Nelson and Lusane counties. The soldiers went into camp and Marshal Merryweather accepted an invitation by Mr Howard, a resident of that vicinity, to his house to supper. While at table three armed men entered and dragged him toward the woods, threatening to make short work with him. Howard however, succeeded in getting the Marshal away from the party. The Marshal made several arrests and served a number of processes. He has returned to Louisville. There is doubtless a regular organization of two or three hundred men in these counties to prevent execution of, and processes from, the Federal Courts.

New York, Sept. 20.—The churches of this city and Brooklyn which have been closed for the summer vacation were re-opened to-day, and regular services were resumed.

ELMIRA, Sept. 23.—As the funeral procession of Mr Carr, to-day, was crossing the track, near the painted post, the express train came along frightening the horses to one of the carriages. The sister of the deceased was literally cut to pieces.

New York, Sept. 23.—Brown, a gelding of John Stewart, at the Fashion Course, yesterday, trotted twenty miles to wagon in 59 minutes and 25 seconds. The trot was accomplished easily. The horse showed no signs of fatigue. The last mile was made, apparently without exertion, in 3:02. This feat is said to be unparalleled.

New York, Sept. 23.—Minister McMahon sailed to-day for the Argentine Republic.

A dispatch received to-day announces the completion of another section of the Union Pacific Railroad, making eight hundred and twenty miles.

A stupendous swindle has been detected here by a company organized entitled, the Brooklyn Steamship and Land Company. One hundred thousand dollar bonds constitute the funds in circulation in all parts of the country, many having gone to California.

FORT WALLACE, Sept. 24.—The scouts from Col Forsyth's camp, on Dry Fork, report that three or four hundred Indians attacked the camp. Col Forsyth having only fifty men, crossed to a small island. The Indians commenced firing and kept it up until sundown. The scouts were obliged to crawl on their hands and knees two miles through the Indians to escape from camp. They heard firing back of the camp all next day. The casualties are: Col Forsyth, left leg broken by a ball shot through the right thigh; Lieut Berther, shot in several places and is supposed to be dying. His back is broken and he begged the men to kill him. Dr Myer was shot in the head while dressing Col Forsyth's wounds. Two men were killed and twenty wounded. All the stock of the command was killed, and the men were living on horse-flesh. The scouts had only one and a half pounds to last them into Wallace. The party had sixty rounds of ammunition when they left and were fortifying. The scouts could only travel at night on account of danger from Indians, they being seen every day. On learning Col Forsyth's condition, Col Bankhead, commanding at this post, sent out one hundred men with arms and ammunition, to his relief.

Later news says Gen. Nichols, just arrived from Fort Reynolds, reports Lieut Berther dead, Dr Moore mortally wounded and dying, and Col Forsyth nearly as bad. All were lying there, with the Indians all around them, eating horse-flesh and waiting patiently for relief. Cola Bankhead and Carpenter will reach them to-night.

New York, Sept. 24.—It is reported to-day that the steamer Dumbarton, suspected of having left this port for a cargo of slaves from Africa, was really loaded with arms for the Spanish revolutionists.

The prayer meeting at Kit Burns' to-day, was succeeded by a fight. The latter is said to have been the best attended.

WASHINGTON, Sept. 24.—It is believed that no further attempt will be made to try Surratt, owing to the great expense the Government has been put to in the former trials.

Europe.
HAMBURG, Sept. 21.—Kug William arrived in this city to-day. The King meets with his wife and children tomorrow day. His Majesty has made a visit to the Bourse. In reply to an address, he said: "Peace is desired by all. I have the surest hope that it will not be broken. The speech at Kiel was intended to give the strongest assurance to the people. I cannot understand how the opposite impression could have been derived from the words I used on that occasion." The explanation was received with great enthusiasm.

Cariboo News.
The *Sentinel* of the 29th ult., says, that about forty new buildings have already been erected and occupied on the site of old Barkerville. A number of others are in progress, showing the faith and determination people have in the future of the mining resources of the district. The Mosquito trail has been completed and is said to be a very creditable job to the contractors. Jacob Miller, formerly of the New England Bakery in this city, died on the 25th of September of congestion of the brain. The weather continued very dry in the mines, which is feared will affect the mining prospects of the season.

MINING INTELLIGENCE.
It may safely be said that mining in Cariboo at present is at a standstill. Nearly every creek is dried up, and the principal work that is being done in mining is in the prospecting or repairing line. There are eight claims on WILLIAM CREEK doing a little in the way of washing, viz: The Barker, Sheephead, Eagle, Sheepskin Baldhead, Welsh, Lillocet, and Cariboo; and the whole amount taken out does not exceed 150 oz. On.

MOSQUITO CREEK.
the Minnehaha, Willow, Hooking, Point, Tabb and Discovery co's are doing a little. The whole amount of gold taken out for the past week is about 350 oz. On.

CUNNINGHAM CREEK
Sharp & co. have stopped hydraulic mining and on Monday commenced to wash up for the season. It will take about two weeks to clean up their ground sluice, and they estimate that they will have about \$7000 for their summer's work.

There have been within the last week some very favorable accounts of strikes being made on different localities, on GROUSE CREEK.

The Hard-up co. have got a good prospect in what is believed to be the old channel. On.

SLATE GULCH
a company of 8 interests have struck a good prospect. On.

HARD SCRABBLE CREEK
a fine prospect was struck on Friday last, in a blind shaft from the tunnel. This is looked upon as the best discovery that has been made for the season, as the creek is somewhat extensive and in a good locality. Interests are being held in this new ground at \$1500.

LIGHTNING CREEK.
Great Eastern co. have come across a deep hole in a confined channel. Great Western co. still drifting towards the channel. Fisherie Lass have been paying about wages. Lightning co. ground sluicing under great disadvantages, from the scarcity of water to take away the tailings.

BENCH DIGGINGS.
The Discovery co. have brought in their ditch and set dump-hops and sluices, ready for washing. Good Hope co. drifting for the Discovery lead.

CHASFORD CREEK.
Harvest co. (discovery claim) making \$5 a day to the hand, with the rocker. White & co. sinking; are down 60 feet in the clay.

THE DISEASE OF AMERICA.—Dyspepsia is said to be the disease of America. Its victims may be found in all stations of life. The poor as well as the rich are sufferers from its life-destroying influence. The symptoms of this disease vary greatly in the different stages of the complaint. It generally commences with a sensation of fullness after eating, and a changeable, diminished, or lost appetite. In some instances the appetite is voracious, and when in obedience to its promptings—a large portion of food is taken into the stomach, pain follows in that region, with general distress, nervousness and nausea. Flatulency and heart-burn invariably attend this disease. For all these symptoms

HOSTETTER'S STOMACH BITTERS will be found an invaluable household remedy, as its alterative, corrective and restorative properties are derived exclusively from roots and plants, the virtues of which are acknowledged by pharmacologists and physicians. Separately they have often been prescribed by the profession, but were never combined until Dr Hostetter gave to the world his

HEALTH-RESTORING BITTERS, which have proved a sovereign remedy for dyspepsia and its attendant evils.

Auction Sales.
PRELIMINARY ADVERTISEMENT.
P. M. BACKUS
Has been instructed by
Messrs Sproat & Co.,
TO SELL
Tuesday, Oct. 13th,
AT 11 O'CLOCK, A.M.
